

A USEFUL NEXT STEP

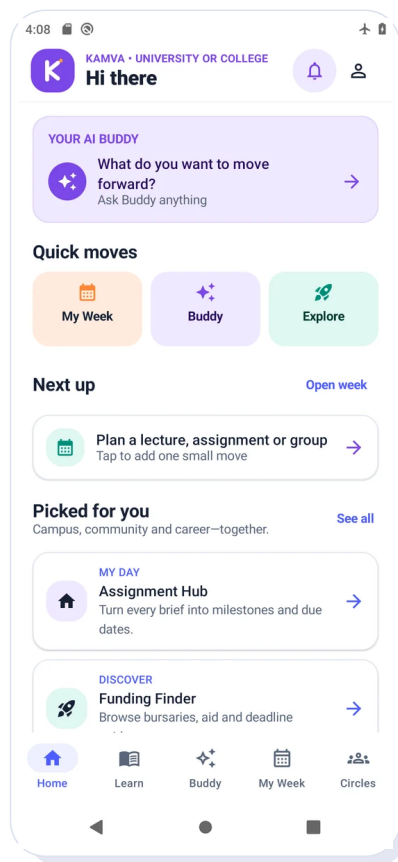

A simpler home for bigger possibilities.

Dedicated tools, deeper guidance and clear paths for school, campus, work and first business. Kamva's wider Android platform remains in development.

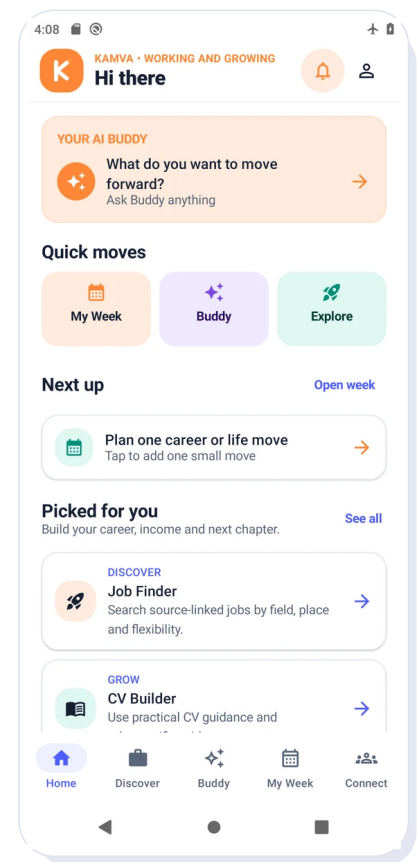

SCHOOL

CAMPUS + TVET

WORK + BUILD

Actual earlier Android prototype screens. These show the product direction, not a public app-store release or live generative AI connection.

A free core that does real work. Explore study routes, draft a CV, make a cash plan and find official opportunity websites. Each tool has its own page so help and details stay close to the task.

01 / MORE THAN A BLANK FORM

See an example. Make it your own.

Guidance should remove confusion without inventing qualifications, promising admission or hiding important provider rules.

ESTIMATE / EXPLORE / VERIFY

APS + faculty guidance

Explore all 26 public universities and 155 illustrative programme cards. Calculate a common-scale estimate, select faculty routes and open official sources. Verify subjects, language, tests and portfolios; this is not every degree or its full requirements.

EXAMPLES / SKILLS / FACTUAL REVIEW

CV studio

Choose a sector such as retail, hospitality, administration, technology, trades or healthcare support. Use prompts and sample achievement wording to explain experience honestly. Volunteering, school projects and informal work can count when described accurately.

Keep the limits visible. APS methods differ and minimums do not guarantee selection. CV examples are ideas to adapt, not facts to paste as your own. Review names, dates, training and achievements before sharing.

Good next steps: open the current prospectus; save the official admissions page; tailor the CV to a real vacancy; check spelling and contact details; print a basic PDF.

02 / PRACTICAL DECISIONS

Know where to look. Know where cash goes.

The directory connects users to providers. The cash planner helps them ask better questions about a business before committing money.

INCOME / COST OF SALES / EXPENSES

Cash planner

Plan sales and direct costs separately. Add operating expenses such as rent, electricity, internet, salaries, marketing, insurance, transport, repairs, subscriptions and professional fees. Distinguish profit from cash movement.

SEARCH / FILTER / OPEN THE SOURCE

Opportunity directory

157 source-linked entries: all 26 public universities, all 50 public TVET colleges, plus bursary, work, enterprise, private-study and guidance routes. Independent directories are labelled. Confirm current dates, eligibility and application instructions directly.

Protection by design. Do not pay a stranger for a guaranteed bursary or job. The directory is curated and needs ongoing checks; a link is not an endorsement or a promise that a programme is open. Financial examples are learning aids, not accounting or tax advice.

Useful habits: keep evidence for real expenses; separate owner drawings from operating costs; check unpaid invoices and bills; confirm every application route with the official provider.

03 / A CLEARER OFFER

Free essentials. Optional business depth.

The website and business offer are designed to be understandable at a glance. Plans below are proposed; production billing and entitlement controls remain release-gated.

Free / R0

Core tools. Business income/expense tracking and cash view, plus 10 invoices and 20 quotes each month.

Starter / R49 month

No monthly invoice/quote quota within published service/fair-use limits. Document PDF and WhatsApp sharing planned.

Books / R89 month

Ledger, reports and accountant export. Combined advanced direction includes team access, bank imports and VAT support as each is safely released.

Parent essentials / planned

Verified linking, agreed homework and revision, quiet-time digests and multi-child navigation. Private chats, prayers, journals and location are not shared. Review permissions at age 18.

Passwordless account access is built for release checks. Production email delivery and guardian approval still need end-to-end verification. Tool entries stay in the current page, not a cloud record.

Company registration TBC. Questions: info@kamva-app.co.za | kamva-app.co.za
