KAMVA / 30 OCTOBER 2026

Kamva Private School Commercial Proposal

School branded communication administration and sport

We invite your school to review Kamva Class and Kamva Sports, register its priorities and help define an approved testing programme. The proposed service gives your school a branded space for family communication, the school day and sport within one Kamva platform.

What the school is considering

The intended experience uses your school name, approved logo and colours across a responsive portal, a planned shared app and a planned opted-in WhatsApp channel. A parent should be able to find notices, timetable changes and match information in a recognisable school environment.

This is a proposal for South African private and independent schools. It is separate from Kamva's public-school, community and sponsor-funded programmes. Schools choose their own scope; an enquiry does not create a contract or payment obligation.

Commercial starting point

Proposed Core pricing is R48 per enrolled learner per year. Alternatively, a school may request an annual capacity package for the same Core scope. Choose one pricing route, then add only the released modules your school needs. All listed packages cover one campus.

What you can review now

- A fictional school studio demonstrating colours, logo, notices, schedules, sample attendance, marks and sports workflows. It does not store real school or learner records.
- Existing free web tools for APS estimates, CV preparation, cash planning and source-linked opportunities, alongside the adult school-enquiry route.
- A scoped discussion about your current systems, school size, sporting programme and preferred evaluation period.

The school offering is a demonstration and enquiry experience. Production school accounts, native app access, WhatsApp delivery and advanced modules require an agreed pilot scope and release approval.

Explore the school and sports preview

School experience and delivery scope

The proposed core covers school branding, parent and staff access, notices, calendars and exam schedules, basic attendance, basic sports fixtures and links to free APS and CV tools. Each operational function will be confirmed in the written rollout scope before activation.

Area	Proposed school experience	Delivery status
Identity and access	School colours and logo; school roles; responsive portal; planned shared app.	Preview now; production pilot by agreement
Communication	Class and school notices, resources, reminders, parent-teacher threads and acknowledgement tracking.	Planned operational release
School day	Timetables, exams, basic attendance, homework, event responses and permission slips.	Sample workflows; live functions phased
Administration	Admissions, family updates, conduct, staff permissions, exports and management reports.	Advanced roadmap; separately scoped
Academic records	Assessment setup, marks, progress, report comments and report generation.	Specialist validation before release
Finance and shop	Fee records, statements, reconciliation, collections and school shop connections.	Later module and integration review
School sport	Fixtures, teams, training and availability; optional Sports Pro for advanced competition tools.	Fictional preview; pilot sport by sport

Channels and branding

School branding means an agreed space inside Kamva. It does not include a separate school-owned app, an app-store listing or a custom public website build. Native access and WhatsApp delivery are planned. Sensitive records stay behind authentication; WhatsApp will carry agreed notices and secure links.

Message receipts must reflect what the provider actually confirms. App, WhatsApp and SMS allowances, media storage and support terms will be stated in the quotation. These channels are not an unlimited bundled entitlement.

Proposed launch pricing

Choose either the exact learner-count route or a capacity package. Both quote the same Core scope; the fees are not added together. Capacity pricing can provide a fixed annual budget within an agreed learner bracket. Compare both using your actual learner count.

Core pricing route	Annual amount	Monthly equivalent
Per enrolled learner	R48 per learner	R4 per learner
Starter 1 to 300 learners	R14,280	R1,190
Mid Tier 301 to 800 learners	R32,280	R2,690
Enterprise 801 to 1,500 learners	R51,480	R4,290
1,501 or more learners or multiple campuses	Scoped group quote	By quotation

Annual billing applies. Monthly figures are comparisons, not month-to-month offers. Instalments can be requested separately. Parents and staff do not count as learners. Exclusive of VAT if applicable; VAT status and final total confirmed in the written quotation.

Examples using actual school size

Learners	Per learner Core each year	Capacity Core each year
200	R9,600	R14,280 Starter
500	R24,000	R32,280 Mid Tier
1,000	R48,000	R51,480 Enterprise
1,500	R72,000	R51,480 Enterprise

For 500 learners, Core plus Sports Pro is R31,800 per year on the learner-count route, or R40,080 on the Mid Tier route. The capacity plan is not always the cheaper choice. These examples exclude any applicable VAT and separately agreed charges.

Onboarding and commercial conditions

Standard onboarding is R2,500 once off, waived for full annual prepayment or an agreed two-year contract. Standard authorised CSV import will be scoped first; complex migration and direct system integrations require a separate estimate. A waiver is not acceptance of a contract.

These are proposed launch prices, not live subscriptions or a binding quotation. Availability, final totals, support, permitted usage, renewal and exit terms must be agreed in writing before a paid service starts.

Sports and optional modules

Optional module	Annual amount	Proposed additional scope
Sports Pro	R7,800 R650 monthly equivalent	Competition formats, score capture, confirmed results, tables and player development workflows.
Pay integration	R3,000 R250 monthly equivalent	Approved provider connections and agreed reconciliation workflow; provider approval and fees are separate.
School LO workflow	R5,400 R450 monthly equivalent	Educator assignments, cohort progress and school reporting. Basic APS and CV tools remain free.

Optional modules are planned and charged only after their scope is released, accepted and activated. They are not a promise that every advanced feature is available on the launch date. Exclusive of VAT if applicable; VAT status and final total confirmed in the written quotation.

A sports programme parents can follow

Bring practice, fixtures, venues, transport and availability into the school calendar. The intended Sports Pro workflow supports round-robin, knockout and pool competitions, results confirmed by both teams and a clear record of corrections. Scoring rules and offline behaviour will be tested sport by sport.

Private player records can later connect achievements and appropriately consented clips to verified trials and study opportunities. Scouting access, HD media, ticketing and registration payments require separate readiness and safeguarding checks. No player pays for placement; no outcome is guaranteed.

School control before real learner use

- Verify the school and authorised staff, then test role permissions and parent-learner links. Keep records private by default.
- Agree guardian permissions and separate choices for photographs, public results and scouting where required. Do not use a demonstration to collect real learner information.
- No adult-minor private messaging, learner data sales, child-targeted ads or betting content. Business monetisation does not operate inside the school space.
- Confirm operator agreements, hosting and transfers, retention, backups, export, deletion and incident response before production access. This proposal is not a compliance certificate.

Evaluation onboarding and quotation

Apply for an evaluation

Apply for an evaluation lasting up to 60 days. Approved scope, availability, start date, support and any third-party costs must be agreed first. No automatic paid conversion. Interest registration is free and carries no purchase obligation. We will confirm which working functions are available and whether testing uses fictional or authorised records before it begins.

Stage	School and Kamva agree	Evidence before progression
Discovery	Priorities, learner count, one campus or group, school-only or school-and-sports needs, current systems.	Written scope and designated adult contacts
Preparation	Brand assets, approved CSV mapping, roles, parent links, permissions and support boundaries.	Authority and data-processing arrangements
Evaluation	Available workflows, support, duration and measurable checks such as notice delivery or fixture corrections.	Recorded issues and school acceptance
Paid activation	Released modules, final price, usage allowances, charges, renewal and exit terms.	Signed agreement and readiness approval

Information for an accurate quotation

Tell us your school name, province, contact role and work email; enrolled learners, campuses and expected parent/staff accounts; preferred Core pricing route; school-only or school-and-sports scope; sports, teams and competitions; current systems; channels; desired start date and optional modules.

Share an authorised logo or a school website link and the approved colour palette. Do not send learner names, birth certificates, health records or safeguarding disclosures in the enquiry. A quotation request does not enrol children or activate a school portal.

Apply for testing access

Request a school or school and sports quotation

The enquiry form uses a verified adult account. If a link opens at sign-in, select the enquiry purpose and package on the form after signing in. You can also contact info@kamva-app.co.za.

Pricing references and company details

Public supplier pages checked on 30 October 2026 informed the purchasing structure. They are not like-for-like quotations or proof of Kamva feature parity. Their published functions are supplier descriptions, not independent product tests.

Reference	Published structure	Comparison limit
MyEncore	R50 per learner per year under 1,000; R2,500 onboarding included with annual prepayment. A staged large-school rate starts at R27 in year one for 1,000 or more learners.	The large-school discount changes by year; paid messaging and payment extras exist.
d6 Communicator	R640 monthly for 1 to 1,000 members; R1,030 for 1,001 to 3,000; R1,570 for 3,001 to 5,000. Implementation charges apply.	Members are not learners. These are not full school-management-suite prices. d6 offers WhatsApp.
mySchoolApp	Essential from GBP49 monthly excluding VAT; upgrades quoted.	School communications product; confirm scope and contract.
School Life	Basic GBP40, Standard GBP55 and Premium GBP70 monthly, plus GBP500 setup. Minimum 12 months.	UK pricing; no currency conversion or SA availability assumed.
ParentSquare	Annual enrollment-based district subscription; packages and modules quoted.	No verified public dollar tariff used here.
