KAMVA / 30 OCTOBER 2026

Kamva Company Profile

School life study work enterprise and sport

Kamva is building a South African platform that connects school life, study choices, work readiness, entrepreneurship and sport. We retain one master brand and a shared account model while giving each audience its own space, permissions and commercial offer.

The Kamva platform

Space	People and purpose
Kamva Class	School leaders, teachers, parents and learners. A school-branded communication and operations experience.
Kamva Pathways	Learners, students and job seekers. Study and work tools, opportunities and guided next steps.
Kamva Business	Adult founders and small businesses. Kamva Books and practical planning tools.
Kamva Sports	School, club, campus and community teams. Participation, competitions and consented player pathways.
Kamva Partners	CSI teams, foundations and institutions. Information requests and planned aggregate impact reporting.

The intended architecture keeps one company, one app and one login. Shared identity does not permit automatic transfer of school records to Pathways, Business or scouting services. Kamva Campus is a later extension for tertiary institutions, not a separate current application.

Current access and release status

The website provides APS estimates, guided CV preparation, cash planning and source-linked opportunities. Kamva Books has a saved adult web beta. School and Sports screens use fictional examples; school enquiries invite interest, testing applications and quotation requests.

Native school-app access, WhatsApp delivery and operational school accounts are planned. Android test screens and interactive previews illustrate the intended product, not a public app-store launch or a proven school deployment.

Private school and sports offering

Kamva Class and Kamva Sports are being developed for independent schools that want a recognisable place for family communication, school schedules and sport. Each school will use its approved colours and logo within the shared Kamva platform.

The proposed school experience

The proposed core covers school branding, parent and staff access, notices, calendars and exam schedules, basic attendance, basic sports fixtures and links to free APS and CV tools. Each operational function will be confirmed in the written rollout scope before activation.

The wider delivery programme covers parent-teacher messaging, permissions and event responses, admissions, academic reports, conduct, management reporting, school finance and approved integrations. These advanced capabilities require phased delivery and acceptance, rather than an assertion of complete d6 or MyEncore parity.

Sport within the school community

Teams, training, fixtures, transport and availability share the school calendar. Planned advanced sport includes competition formats, confirmed results, league tables and private player development. Later verified trials and sports-bursary links can connect to Pathways with the required permissions.

Proposed Core route	Annual price for one campus
Exact learner count	R48 per enrolled learner
Starter 1 to 300 learners	R14,280
Mid Tier 301 to 800 learners	R32,280
Enterprise 801 to 1,500 learners	R51,480
Larger schools and multiple campuses	Scoped quotation

Choose one Core pricing route; do not add them together. Optional planned annual modules are Sports Pro R7,800, Pay integration R3,000 and School LO workflow R5,400. Basic public APS and CV tools remain free.

Prices are proposed, not active subscriptions. Exclusive of VAT if applicable; VAT status and final total confirmed in the written quotation. Onboarding is R2,500, waived for full annual prepayment or an agreed two-year contract. Messaging, payment-provider fees, extra storage and complex migration are separately scoped. No enquiry creates a contract.

Other services and responsible use

Kamva Pathways

Free web tools help users explore APS estimates, prepare a CV, plan cash flow and find official opportunity sources. Planned Buddy support, study plans, interview practice and application tracking will use visible limits and age-appropriate safeguards. No admission, job or bursary award is guaranteed.

Kamva Business and Kamva Books

Kamva Books is an original Kamva product, not a Zoho-backed service or a claim of full accounting parity. Its saved web beta is single-owner, South African rand and non-VAT. Free users can create unlimited quotes and invoices. Business access is for adults aged 18 and over; records should be checked before reliance.

Validated accounting upgrades, accountant exports, team workflows and approved payments remain subject to development and testing. Production bank feeds, VAT filing, payroll and lending services are not presented as current capabilities. School finance will need its own validated design and cannot be assumed from the Books beta.

Privacy and school authority

- Verify the school and authorised staff before real records are introduced. Restrict access by role and confirm parent-learner relationships.
- Keep learner and under-18 player information private by default. Use separate permission choices for optional photos, public results and wider visibility where required.
- No learner data sales, child-targeted advertising or adult-minor private messages. Business monetisation must not operate inside Class.
- Agree data operators, hosting and transfers, retention, export, deletion, incident response and security checks before production use.

Partner reporting is intended to use controlled aggregate measures. It must not reveal private messages, learner identities or business ledgers, including through small-group re-identification. This profile is not a legal compliance certificate.

Company information and engagement

Founder and contracting details

Founder: Emmanuel Vilakazi. Company registration and formal contracting details remain to be confirmed before agreements are concluded. Kamva does not claim approved PBO or Section 18A status, accreditation or guaranteed B-BBEE recognition.

Independent and private schools

Register interest, apply for an evaluation of up to 60 days or request a quotation. Evaluation scope, available functions, start date, support and third-party costs are agreed first, with no automatic paid conversion. Provide learner numbers, campuses, school-only or school-and-sports requirements and current systems.

Register school interest

Apply for testing access

Request a quotation

A verified adult completes the enquiry. Do not send learner names, health information or safeguarding disclosures. School branding is inside Kamva, not a separate school-owned native application.

Public schools communities and partners

The private-school commercial offer is separate from the intended free or sponsor-funded core for public schools and community programmes. Kamva Partners is a web contact point for CSI, foundations, institutions and programme partners. Funding amounts and programme budgets are shared through private prospectus enquiries, not this public profile.
