

SOUTH AFRICAN YOUTH. PRACTICAL POSSIBILITY.

Your future, in motion.

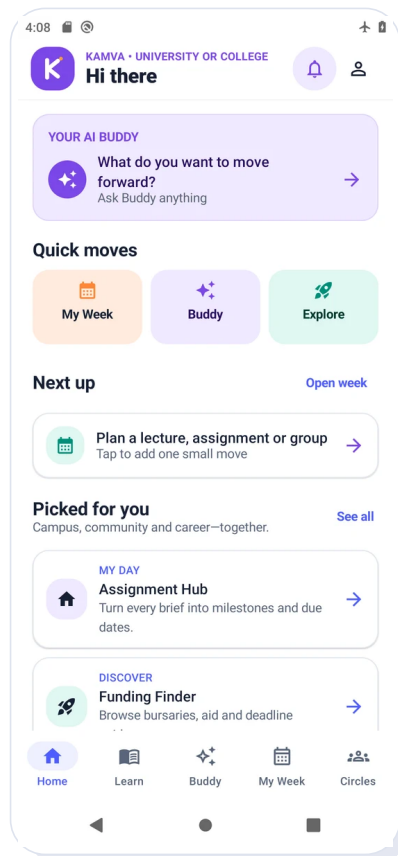

Learn more. Plan better. Build with confidence.

Kamva brings education, opportunity discovery, career preparation and first-business tools into one youth-focused platform. The refreshed website gives each useful tool its own space, guidance and next step.

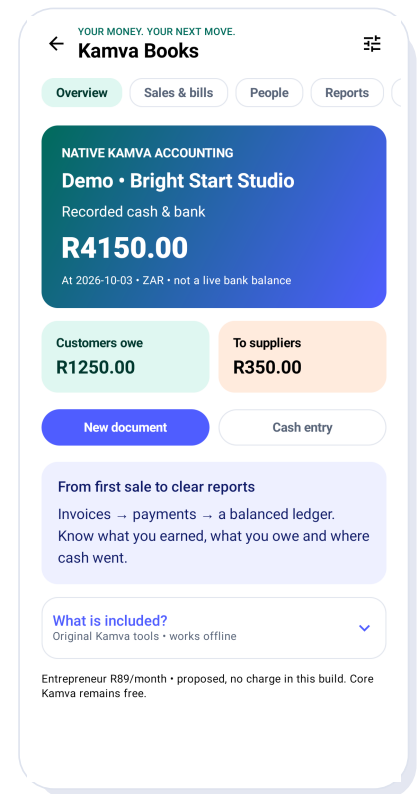

SCHOOL

CAMPUS + TVET

KAMVA BOOKS

Actual Android prototype/test-build images. Earlier layouts are shown to explain the product direction. Books records are synthetic; on-screen AI labels do not establish a connected AI service.

Target launch: Saturday 13 March 2027 | Venue TBC

01 / WHO WE ARE

A practical bridge from intention to action.

A South African platform in development, designed to make useful guidance and everyday tools accessible. The free core should remain meaningful, not a teaser for a paywall.

FOCUS BEFORE BREADTH**One product, three early priorities**

Opportunity discovery, Kamva Buddy and Kamva Books. Individual tools come before large communities, marketplaces and complex financial connections.

Organisation	Kamva. The registered legal applicant and company registration number remain TBC.
Accountable contact	Emmanuel Vilakazi. Signing authority and governance arrangements must be confirmed before contracting.
Operating approach	Useful free tools, optional business upgrades and agreed project funding for development and responsible delivery.
What is not claimed	No public app-store release, signed funder, enrolled cohort, PBO/Section 18A status or independently proven outcomes.

Access is not conditional on faith. Optional reflection and prayer features are separate from education and opportunities. Young people should not need to disclose personal beliefs to use practical support.

02 / ONE TASK, ONE PAGE

Less hunting. More helpful guidance.

Each free tool has a dedicated page. Users can focus on the question they came to answer, then follow a relevant next step instead of scrolling one long page.

STUDY WITH DIRECTION

APS + university routes

All 26 public universities are represented, with 155 illustrative programme cards. Estimate an APS, explore faculty routes and open the official requirements.

TELL YOUR STORY

CV studio

Choose a profession or sector; see honest examples, useful prompts and skills ideas. Draft and review a CV, then print a basic PDF without paying.

KNOW YOUR NUMBERS

Cash planner

Separate income, cost of sales and operating expenses. Understand gross profit, operating result, cash timing and the money left at month end.

FIND THE RIGHT DOOR

Opportunity directory

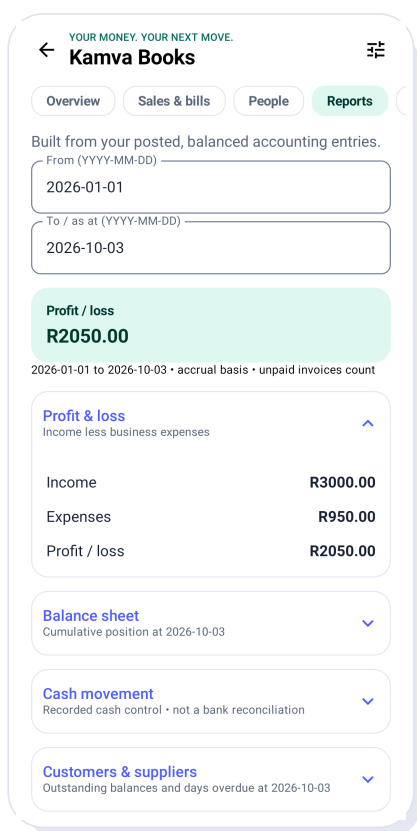

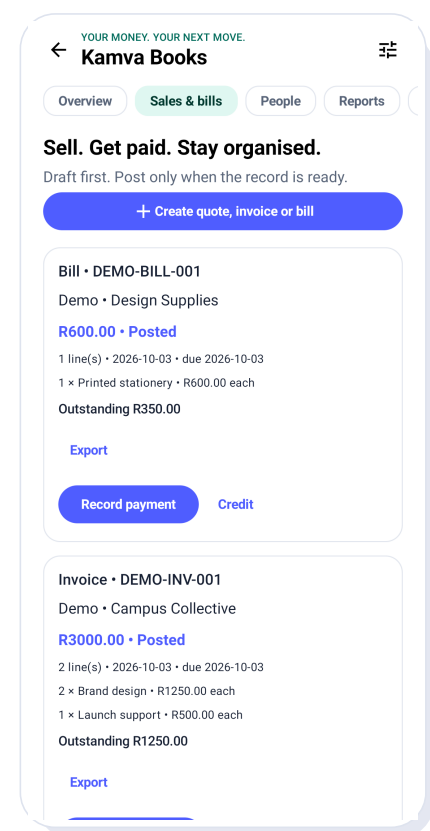

157 source-linked entries cover all 26 public universities, all 50 public TVET colleges and wider funding, work and enterprise routes. Verify current availability.

A guide, not an admission decision. The 155 cards are illustrative, not every degree or its complete requirements. APS methods, subjects and selection vary by programme and year. The directory is curated, not every current opportunity.

03 / ORIGINAL KAMVA BOOKS

Your business. A clearer financial picture.

Kamva Books is an independently developed accounting foundation, not a Zoho-backed service. The proposed offer now has three simple levels.

NATIVE TEST-BUILD IMAGES

Quotes. Invoices. Ledger. Reports.

Synthetic records demonstrate local test functionality. Production security, accounting acceptance and subscription controls remain release requirements.

Free business / 10 invoices + 20 quotes per month

The free plan is proposed to include income and expense tracking, a cash view and useful monthly document allowances. Starter adds document productivity; Books combines reporting and the planned advanced capability roadmap at R89 per month.

Included in the intended Books direction, not active today: multi-user access, bank imports and VAT support. No live bank feeds, statutory tax filing, payroll or cloud team ledger is claimed.

04 / PARENT ESSENTIALS ARE PLANNED

Support the schoolwork. Respect the person.

A parent pathway should build collaboration, not surveillance. Verified relationships and explicit sharing boundaries come before access.

PROPOSED SHARED VIEW

Useful shared essentials

Agreed homework and tasks; revision and exam planning; weekly digests; quiet-time settings; multi-child navigation; subject, career and application conversations.

NOT A MONITORING FEED

Private stays private

No parent access to private chats, prayers, journals or location. No automatic access to financial records. Partner reports use aggregated programme evidence.

Account release status

Passwordless account access is built for release checks. Production email delivery and guardian approval still need end-to-end verification. Tool entries stay in the current page, not a cloud record.

Learner protection

Explain sharing, support disputes and revocation, verify the adult-child relationship and review access when the learner turns 18.

Children's information needs an applicable lawful basis and wider privacy/security safeguards; consent alone is not the whole POPIA compliance programme. [S7]

[S7] Information Regulator: Children's information guidance

05 / COMMERCIAL DESIGN

Useful for free. Upgrade when it helps.

Proposed monthly business prices. Billing and enforced plan entitlements remain release-gated; publish exact scope, fair-use terms and tax treatment before sale.

Free / R0

Core youth tools and planned parent essentials. Business income, expenses and cash view; up to 10 invoices and 20 quotes each month.

Starter / R49 month

Business document productivity: no monthly invoice or quote quota within published service/fair-use limits; PDF and WhatsApp sharing planned.

Books / R89 month

Combined Books and advanced offering: ledger, reports and accountant export. Planned extensions include team access, bank import and VAT support, only as they are built and accepted.

NO ROADMAP SOLD AS A LIVE ENTITLEMENT**One advanced offer, one proposed price**

There is no separate Pro price. Planned features must retain a visible status label until they work, are supported and have passed the relevant security or accounting checks.

Ordinary opportunity discovery and a basic CV PDF remain free. Funding discussions support delivery costs; they do not create a student subscription charge.

06 / FUND USEFUL INFRASTRUCTURE

Help build the service. See how funds are used.

Discuss a ring-fenced development, hosting, support, safeguarding or content contribution. Agree deliverables and evidence rather than a fixed per-student access package.

Annual operations / Apr 2027-Mar 2028

People, technology, delivery and governance; includes contingency

R3,220,800**Prelaunch readiness / Jan-Mar 2027**

Engineering, security, privacy, testing and deployment

R550,000**Optional launch event**

Target Saturday 13 March 2027; venue and time TBC

R120,000**Total first-programme planning requirement**

No committed funding or sales are deducted

R3,890,800

- Confirm the legal applicant, delivery owners, banking details and contracting authority.
- Agree eligible costs, milestones and independent evidence; prevent duplicate allocation.
- Measure completed actions and verified outcomes separately. Do not count applications as awards or jobs.

B-BBEE recognition depends on applicable codes, evidence and independent verification. Section 18A approval is separate; no points or deductible receipt are promised. [S4-S5]
